

## **Austin Healey 3000 Parts for sale:**

I can personally vouch for the stated quality (1, 2, 3, 4) of these parts as I've owned my two-and-a-half Healeys for more than 30 years. Those ordering a large number of items may be afforded a small discount. However, I hope you'll agree price listed after each part is already more than reasonable. A Moss Motors <http://www.mossmotors.com/> or Victoria British online catalogue number is often referenced to help better identify the individual part or assembly, although as I am sure you are aware, many parts are no longer available or even listed.

Where indicated, I'm selling as assemblies and not individual parts. I listed a few of the individual parts of the assembly by using Moss Motors catalogue numbers as examples.

I generally ship UPS or (occasionally) USPS Priority Mail. Overseas deliveries USPS are surprisingly fast. For example, I recently shipped an Overdrive, Pedal Box and Gas Pedal USPS to Melbourne, Australia and it took less than a week to get there (cost to ship those 52 lbs. of parts was nearly \$300.00!). Lighter weight shipments overseas would of course be correspondingly much, much less.

Also attached is a fairly high resolution jpg image (June10pts) of virtually everything on the list. Actually it's a collage of many photos and parts are not to scale. Better photos of individual parts are available, just email or give me a call. Same applies if I've been unclear.

Thanks,

Russ
